S&S, Lergravsvej 59

HVAD ER PROBLEMET?

Fødselstallet er 'for lavt' (Økonomi)

Kvinder/mænd får ikke ønskede antal børn (rettighed)

Infertilitet er en folkesygdom (sundhed)

'Antal børn per kvinde'
Stor variation – DK relativt højt

Yes, according to no less an expert than the health minister of Japan. Hakuo Yanagisawa made the comments recently as he addressed Japan’s low birth rate.

According to [Reuters](#):

On January 27, Yanagisawa told his supporters in a speech touching on Japan’s low birthrate: “Because the number of birth-giving machines and devices is fixed, all we can ask for is for them to do their best per head.”

‘Antal børn’ afhænger også af hvor mange kvinder der er – ekko af den lille fødselsårgang i 1983

Pas på definitioner – ikke enten/eller

INFERTILITET PÅ VERDENSNIVEAU

Begrænset evidens

Har været op til 50% sekundær I Afrika (historisk) – er faldet
Nuværende – fx Boivin 9% efter 12 mdr

Tellier et al (eds) 2014 Boivin 2008, Mascarenhas 2012

HVAD ER LØSNINGEN?

EUROPEAN PARLIAMENT 2008: the demographic future of Europe

25. Calls upon the Commission to take into consideration the sensitive issue of infertility, which affects both married and unmarried women and couples;

26. Notes that infertility is a medical condition recognised by World Health Organization that can have severe effects such as depression; points out that infertility is on the increase and now occurs in about 15 % of couples; calls on the Member States, therefore, to ensure the right of couples to universal access to infertility treatment;

27. Encourages the Member States to identify good practices in favour of families, family benefits systems and social services of general interest (SSGIs) for protecting and helping families; calls on the Member States to provide support targeted specifically at young parents pursuing their training or studies;
